

THE LIFE-BOAT,

OR

JOURNAL OF THE NATIONAL LIFE-BOAT INSTITUTION.

(ISSUED QUATERLY.)

VOL. VIII.—No. 88.]

MAY 1ST, 1873.

[PRICE 1s.

AT the ANNUAL GENERAL MEETING of the ROYAL NATIONAL LIFE-BOAT INSTITUTION, held at the Mansion House, on Friday, the 21st day of March, 1873, The Right Hon. SIR SYDNEY H. WATERLOW, Lord Mayor of London, in the Chair, the following Report of the Committee was read by the Secretary:—

ANNUAL REPORT.

AFTER one of the most stormy seasons that have for many years taxed the energies of the NATIONAL LIFE-BOAT INSTITUTION, and proved its usefulness, its Committee of Management present an account of their stewardship to its supporters and the British public.

They desire, in the first place, as is their wont, to acknowledge with gratitude the Divine blessing which has attended their exertions to save human lives, and to express their heartfelt thanks to all those benevolent persons who have given the Institution their pecuniary support.

A leading feature in the Annual Reports for several years past has been the long list of new Life-boats, the cost of which has been presented to the Institution by inland cities and towns, public bodies, and private individuals. If the present Report records a much smaller number of those splendid gifts, the diminution has not arisen from any falling off in generous sympathy with the objects of the Institution, but from the satisfactory circumstance that nearly all

localities, where Life-boats can be usefully placed around the coasts of the United Kingdom, have been provided with them.

Nevertheless, taking into account the great fleet of Life-boats under the management of the Society, it must be manifest that a large annual income is indispensable to enable it to maintain its boats in a state of constant readiness for service; to provide for the occasional practice of their crews; and to encourage, by liberal pecuniary and honorary rewards, the boatmen and fishermen on our coast to exert themselves to the utmost to preserve the lives of persons endangered by Shipwrecks.

The transactions of the year may be summarized as follows, under the usual heads:

Life-boats.—Since the last Report five new Life-boats have been placed on the coast, two at new stations, and three to replace old boats. Transporting-carriages have been supplied to four of them, and boat-houses to the two first named.

It is a gratification to the Committee to be able to state that the Life-boats adopted by the Institution continue to

give great satisfaction to their crews, who place the utmost confidence in them. Nevertheless, they are reminded, from time to time, of the dangerous nature of the work which they have undertaken, and of the impotence of the puny efforts of man to contend with the giant forces of Nature when their full power is opposed to him. It will, however, be felt how much this danger adds to the honour and credit to which the brave men who work the Life-boat fleet are so justly entitled.

In their recent Reports the Committee have congratulated the supporters of the Institution on the continued immunity from fatal accidents of its Life-boats. This year, however, they regret to say, must form one of those exceptions that serve, by their contrast, more forcibly to establish a general rule; and they have now to record three accidents, each of which has been attended or followed by loss of life.

The first of these occurred to the Montrose Life-boat, on the 21st Dec. last, when a heavy sea, breaking over her, carried 4 men overboard. Being close to the wrecked vessel whose crew they had launched to save, and seeing that the immersed men were apparently safely floated by their life-belts, the remainder of the crew of the Life-boat proceeded to the rescue of the shipwrecked crew before going to the relief of their own comrades. All of them were, however, then taken safely into the boat; but, unhappily, one of them died a few days after from the effects of cold and exhaustion.

In the second case, which was of a more serious character, the Life-boat stationed at Skerries, county Dublin, on the night of the 1st Feb. last, proceeded, through the darkness, to the aid of the crew of a vessel wrecked on the rocky shore near Balbriggan. The Life-boat ran down under sail, but, before getting into the broken water on the lee shore, took in her sails, and proceeded through it towards the spot where the Wreck was supposed to be; but on account of the

broken character of the water which commonly prevails on a rocky shore, some of the oars were wrench'd from the hands of the crew, and broken or lost; and, it being then impossible to retain any command over the boat, she was anchored. She then safely rode for about an hour amidst the heavy surf, when, the force of the tide setting her broadside to the waves, a heavy broken sea upset her, carrying 7 of her crew away. One of these, the coxswain, succeeded in regaining her, and was helped into her again by the 3 men who had remained in her, she, fortunately, being a self-righting boat. A second time, after an interval of several minutes, she was upset, when again 3 men went round in her, and the fourth, supported by his life-belt, swam to the shore. Her cable was then let go, and, turning athwart the sea a third time, she was again upset. One man was then thrown from her, but his comrades, after this fearful ordeal, being too exhausted to help him into her again, he was secured by a line to her side, and the boat was rapidly carried to the shore without further loss of life.

The third accident occurred to the Ramsgate Life-boat, a boat which has, during the last twenty years, performed, without the loss of a single life, very many noble services, and saved several hundred lives. On the night of the 2nd Feb. last, one of her crew was washed out of her by a heavy sea when alongside a Wreck on the Goodwin Sands, and being lost sight of in the darkness, which, it need scarcely be said, increases many fold the danger of such services, he was unhappily not again seen.

Grieved as the Committee have been at these sad occurrences, they are not discouraged by them; but, as above implied, accept them as a necessary accompaniment of the grand work which it is their privilege to superintend.

It is a melancholy satisfaction to the Committee to report that they have been able to vote from the funds of the Institution nearly 400*l.* in aid of the local sub-

scriptions for the relief of the bereaved families.

On the other hand, the Committee have pleasure in referring to one amongst the many successful and noble services performed by its Life-boats at about the same time; viz., that of the St. Ives Life-boat, which was launched no less than five times in a heavy gale of wind, to the rescue of the crews of three vessels which were wrecked there on the 2nd February last. On that occasion she was twice carried to leeward by the wind, sea, and tide, but, by indomitable perseverance, fresh crews taking the place of those already exhausted, she succeeded in saving 13 lives in all, 2 men from one of the vessels having perished before she could be reached. The Life-boat was reported to have behaved admirably.

The stations at which the new Life-boats have been placed are as follows:

ENGLAND.

YORKSHIRE . . .	Scarborough.
SUFFOLK . . .	Pakefield.
CORNWALL . . .	Newquay.
ANGLESEA . . .	Rhosneigir.

IRELAND.

Co. DUBLIN . . .	Greystones.
------------------	-------------

The Institution has now two hundred and thirty-three Life-boats on the coasts of the United Kingdom, and in the Channel Islands.

During the past year these boats have saved the lives of *five hundred and sixty-nine* persons, nearly the whole of them under circumstances of peril that would have precluded any ordinary boats from proceeding to their aid.

Shipwrecks.—The Wreck Register of the Board of Trade for 1872 is not yet made up, and the number of Shipwrecks in that period, and the loss of life therefrom, cannot now be stated. There can be no doubt, however, that the past year has formed no exception as regards the large number of Shipwrecks which annually takes place on our coasts.

Previous to the heavy storms of No-

vember and December, the year had been unusually free from disastrous gales; but during those two months our coasts were strewn with Wrecks. This pressure of calamity, however, was at once met by such daring and persevering exertions on the part of our Life-boats in saving the shipwrecked crews, that they are quite unparalleled in so short a period—upwards of *three hundred* persons having been saved by them during the storms of those two months alone.

It is hardly possible to realize in all its distressing character the scene of a vessel foundering, or, amidst the wild tumult of the elements, the Wreck beaten into staves on a rocky shore; or the horrors of a collision like that which overtook the emigrant ship *Northfleet* off Dungeness in January last.

It should be mentioned that, in addition to the services of the Life-boats of the Institution in saving life last year, no fewer than twenty-five ships were saved by them, and, in other cases, the boats were repeatedly signalled off by distressed vessels, and afterwards contributed largely to their preservation by encouraging the crews to remain by their ships, and, occasionally, by taking them ashore, in their alarm, and in putting them on board again when the storm had lulled. Even in such instances the hardships and risks occasionally endured by the Life-boat crews are very great.

The efforts of the Board of Trade continue unceasing in the maintenance and extension of the Rocket Apparatus on the Coasts of the United Kingdom, which contributes every year, under the zealous management of the officers and men of the Coastguard service, to the rescue of hundreds of persons from Shipwreck at places where, from their rocky nature, Life-boats could not be made use of.

The number of lives saved during the forty-nine years from the establishment of the Institution in 1824, to the end of the year 1872, either by its Life-boats or by special exertions for which it has granted rewards, is as follows:—

Words fail adequately to delineate the blessings that have flowed to countless numbers of families—apart from those actually saved—by the preservation of upwards of 21,400 persons from Shipwreck, as is here shown. Happily the Life-boat work is now an established fact—and it is certain to be undertaken, with the highest probability of success, on every occasion of storm and danger.

Rewards.—In the Appendix a summary is given of the cases in which honorary and other rewards have been voted. During the past year 6 Silver Medals, 13 Votes of Thanks inscribed on vellum, and 2,637*l.* have been granted for saving the lives of 739 persons by Life-boats, shore and fishing boats, and other means, on the coasts and outlying banks of the United Kingdom.

The Committee continue to occupy themselves with the careful consideration of these Rewards. Each case is minutely inquired into in the first instance through the co-operation of the Officers of Coastguard and Customs, the local Honorary Secretaries of the several Branches of the Institution, or other responsible persons; and afterwards they are thoroughly scrutinised by the preparatory Committee, previous to their being sanctioned by the General Committee at their monthly meetings.

The Committee again acknowledge with gratitude the prompt and cordial co-operation of the Lords Commissioners of the Admiralty, and of the Officers and men of the Coastguard Service.

Since the establishment of the Institution, it has expended on Life-boat establishments, and other means for saving life from Shipwreck, upwards of 300,000*l.*, and has voted 91 Gold and 842 Silver Medals for saving life, besides pecuniary rewards to the amount of over 40,000*l.*

Local Committees.—The Committee of the Institution have the satisfaction of acknowledging the continued valuable and zealous co-operation afforded them

by the Local Branch Committees and the Honorary Secretaries, which constitute so important a portion of the machinery of the Institution for the supervision of its several Life-boat establishments.

Finances.—The total amount of receipts during the year 1872 has been 27,331*l.* 14*s.* 4*d.*, and of this sum 4,630*l.* was the result of special gifts, to defray the cost of the following eight Life-boats:—

Rype and Chalvington, Sussex, Harvest Thank-offerings, per Rev. R. S. Sutton, M.A.	5 19 11	As already stated, the Institution has now a Life-saving fleet of 233 boats; and it is gratifying to know that every one is a gift boat. Again, the organization for saving life from shipwreck now established all round our coast is as complete as can be, and receives the hearty co-operation of our seaboard population.
Seaham, Seamen of, Proceeds of Sale of their old Life-boat, per Wm. Warham, Esq.	12 19 0	Sailors and fishermen are always ready to help each other when in distress, and hence the Life-boat seldom experiences much difficulty in being manned by a class of men who, not unfrequently, run as much risk as those whom they have put off to succour from the Wreck.
"Strathclyde" Steam-ship of Glasgow, Proceeds of Concert on board, and Contribution of Crew, per Captain C. W. Pearson	6 0 0	And thus the work of the Institution exercises a humanising and salutary influence on our coast population; and its existence becomes increasingly important —arising from the fact that our narrow seas are every year crowded more and more with the shipping of all nations.
Well Street Sailors' Home, Collected at, per Captain W. H. Webb, R.N. Whitburn (Durham) Church, Offer-tory at, per Rev. W. M. Hitchcock, M.A.	29 9 4 20 0 1	The Committee feel that an Institution which had its origin nearly fifty years ago in the purest philanthropic effort of the age, and which has ever since ceaselessly toiled to carry out its merciful and patriotic mission, will never have to appeal in vain to the British public at large for sympathy and support.

VOTED BY THE ROYAL NATIONAL LIFE-BOAT INSTITUTION

FROM THE 1ST JANUARY TO THE 31ST DECEMBER, 1872.**

JAN. 1, 1872.—The Gorleston Life-boat put off, and saved the crew of 5 men from the schooner *Sibyl*, of Yarmouth, which had gone on the North Sand, Gorleston, during a fresh wind and in a high sea.—Expense of service, 7*l.* 8*s.*

Jan. 2 and 4.—The Yarmouth large Life-boat proceeded out, and rendered important services to the barque *Ellen*, of Llanelli, and brig *Marie*, of Colchester, both of which were in distress in Yarmouth Roads. With the aid of the Life-boat, both the vessels were got safely into Harbour.

Jan. 3.—Ten men forming the crews of the Fishing yawls *Lightning* and *Conqueror*, of Green-castle, rescued 3 out of 4 men from the fishing-boat *Eliza*, which was capsized off Gortgowan, on the Irish Coast.—Reward, 5*l.*

Jan. 4.—The Maryport Life-boat went off during a fresh gale from W.S.W., and saved

the crew of 3 men of the schooner *Cygnet*, of Workington, which was wrecked near the North Pier, Maryport.—Expense of service, 7*l.* 3*s.* 6*d.*

Jan. 4.—Voted 7*l.* 10*s.* to the crew of the Gorleston private Life-boat *Refuge*, for saving from a boat the crew of 6 men of the schooner *Irene*, of Whitby, which had been wrecked on the Cross Sand, near Great Yarmouth, during a gale from N.E., on the 4th December, 1871. The crew of the *Refuge* also brought ashore 7 men belonging to the schooner *Princess Victoria*, of Aberdeen.

Also 4*l.* 5*s.* to JOSEPH DOBSON and 13 other men for rescuing 13 men from the iron steam-packet *Minister*, of Lubeck, which had stranded at Grainthorpe Haven during a N.E. gale on the 30th November.

Also 4*l.* to a shore-boat's crew belonging to Wexford, for bringing safely ashore 1 man from the

brigantine *Thermetis*, of Liverpool, which, during a strong gale from the S.W., became a total wreck on the Blackwater Bank, on the 17th December.

Also 3*l.* to 6 Filey fishermen for putting off in a coble and saving 7 men from a boat belonging to the schooner *Louisa*, of Rye, which had foundered off Filey Brigg, during a very heavy gale from the N.E., on the 1st December.

Also 2*l.* to five Coastguardmen for going off in a boat, and rescuing 2 men from the ketch *Two Brothers*, of Dover, which was wrecked near Broadstairs, during a strong gale from S.W. by W., on the 20th December.

Also 39*s.* 6*d.* to pay the expenses of the Life-boats stationed at Maryport, Swansea, Brooke, Tenby, and Thorpe, in either assembling the crews or putting off, in reply to signals of distress from various vessels, which, fortunately, did not ultimately require the aid of the Life-boats.

Jan. 5.—While it was blowing a heavy gale from S.W. to N.W., the Abersoch Life-boat went off, and, after much difficulty, saved, in conjunction with a steamer, the ship *Ireland*, of Liverpool, which had been abandoned by her crew, and which was in a dismasted condition off Pencilan. The ship would assuredly have gone on the rocks had not the Life-boat men boarded her just in time.

Jan. 10.—The Lizard Life-boat put a pilot on board a steam-tug, which had in tow a ship and a dismantled schooner. The vessels were then taken to Falmouth by the tug.—Expense of service, 7*l.* 13*s.*

The captain did not require the services of the Life-boat, but her crew took ashore a message for a steam-tug to come to his assistance. The owners of the *Ronachan* defrayed the expenses of this service, which was of a very perilous character.

Jan. 23.—The St. Andrew's Life-boat put off, during a gale from the S.E., and rendered assistance to the schooner *Oal*, of Sandness, Norway, which was in a distressed condition near the West Sands, St. Andrew's. — Expense of service, 4*l.* 12*s.* 6*d.*

Voted also the thanks of the Institution, inscribed on vellum, to the Rev. HUGH WILSON, Honorary Secretary of its Ballywalter Branch, together with 5*l.* to 4 other men, in acknowledgment of their services in saving 3 men whose boat had capsized off Ballywalter, Co. Also 5*l.* 6*s.* 6*d.* to pay the expenses of the Castletown, Blackpool, Abberystwith, Broughty Ferry, Rhyl, and Holyhead Life-boats, in either assembling the crews, or putting off, in reply to signals from various vessels, which did not ultimately require the aid of the Life-boats.

The Newbiggin, Anstruther, and Buddon Ness Life-boats had also been taken out in readiness to assist distressed vessels, but eventually their services were not required.

A reward of 5*l.* was voted by the Institution to the PINELS for those kind services.

Also the Thanks of the Institution, inscribed on vellum, and 1*l.* to Mr. J. SEGRUE, 1*l.* each to RICHARD MAUNDER and RICHARD KERWIN, and 2*l.* to four other men for bringing safely ashore from the Mewstone, 2 men and a boy who had taken refuge on that rock on the 24th Oct.

Dec. 21.—During a South-easterly gale and in a tremendous sea, the brig *Henriette*, of Memel, from Sligo to that port, was seen running before the wind and making for the land. On the whole

coast of the British Isles there are no braver and more expert men than those at Montrose. Accordingly, seeing the course the vessel was taking must inevitably lead to destruction, they immediately got out the two Life-boats. The No. 1 Life-boat was successfully launched through a heavy surf, and taken to the harbour's mouth. From the position of the ship it was manifest that the Life-boat must cross the Annat Bank, to reach the vessel, and over that bank the seas were ceaselessly rolling. There was no time for hesitation, if the foreigners were to be saved. The coxswain gave the word of command, and instantly the Life-boat pursued her dangerous way. She successfully crossed the Sand, and when within a few yards of the ship, which was now stranded, a tremendous sea washed over the noble boat, which staggered her fearfully for an instant, and washed away her skilful coxswain and three of his best men. In an instant another heavy wave took the Life-boat close to the wreck, from which six of her crew in a twinkling threw themselves into the Life-boat, and in another moment the boat's head was turned and she happily succeeded in picking up the coxswain and his three men. The men then pulled for the land with all their strength, the coxswain and three men being all but insensible, having been much knocked about in the wreckage. Meanwhile the No. 2 Life-boat had been taken a mile or so along the shore and successfully launched, and happily succeeded in saving the remaining shipwrecked men, 3 in number. Unfortunately, ALEXANDER PATON, one of the men thrown out of the Life-boat, died a few days afterwards from the effects of his exposure. The Institution expressed its deep sympathy with his

widow, and voted 50*l.* in aid of the local fund raised for her relief. The Society also voted a Silver Medal to each of the two coxswains, Mr. Wm. MEARNS and Mr. Wm. MEARNS, jun. in acknowledgment of their long and gallant services in the Life-boats.—Total expense of this service, 84*l.* 13*s.* 6*d.*

Dec 27.—The Padstow Life-boat went out during a heavy gale from the S.S.W. and rescued the crew of 3 men from the sloop *Caroline Phillips*, of Port Isaac, which had gone ashore at the entrance to Padstow Harbour.—Expense of service, 7*l.* 6*s.*

Dec. 31.—The barque *Emmeline*, of Bordeaux, was seen with a flag of distress flying, about eight miles to the eastward of Sidmouth, while it was blowing a gale from S.W. The Sidmouth Life-boat was launched, and brought safely ashore the crew, consisting of 11 men.

Dec. 31.—Voted 41*l.* 2*s.* 6*d.* to pay the expenses of the Life-boats stationed at Pakefield, Newbiggin, Castletown, Peterhead, Margate, New Romney, Montrose, Rye, Winchelsea, Yarmouth, Selsey, Thorpe, Wicklow, Holyhead, Ballywalter, Theddlethorpe, Kingsdowne, Ballycotton, Chapman's Pool, Mullion, Padstow, Broadstairs, Wexford, Lowestoft, Walmer, Mundesley, Porthleven, Penarth, Holy Island, Hauxley, Peterhead, and Fowey, in either assembling the crews, or putting off, in reply to signals of distress from various vessels, which did not ultimately require the aid of the Life-boats.

The Ramsgate, Penzance, Tenby, and Youghal Life-boats had also been got out in readiness to render assistance to distressed vessels, but their services were not eventually needed.

ROYAL NATIONAL LIFE-BOAT INSTITUTION,
14 John Street, Adelphi, London, W.C.
May, 1873.

The Medal
OF THE
ROYAL NATIONAL LIFE-BOAT INSTITUTION,
FOR THE
PRESERVATION OF LIFE FROM SHIPWRECK.

Obverse.—Bust of Her Majesty Queen Victoria; beneath, in minute letters, “L. C. Wyon.” Double legend, “Royal National Life-boat Institution. Founded in 1824. Incorporated 1860. Victoria, Patroness.”

Reverse.—Three sailors in a Life-boat,—one of whom is in the act of rescuing an exhausted mariner from the waves on a fragment of the wreck. “W. Wyon, Mint.” Inscription, “Let not the deep swallow me up.”

The beautiful obverse of this medal, executed by L. C. WYON, Esq., represents the bust of QUEEN VICTORIA, Her Majesty's locks gracefully waving and gathered in a knot behind, from which issues a wreath of oak clustering over the forehead. This life-like portrait of the QUEEN, in high relief, conveys a truly pleasing and faithful likeness of HER MAJESTY, combining dignity of aspect and benevolence of nature; and represented by Mr. WYON with the most exquisite finish, delicacy, and beauty of workmanship.

The reverse, representing the Life-boat, in which there are three Sailors, rescuing a fourth from the sea, is a work of superlative merit. Two of the Sailors are steadying the boat, while the other, stooping, draws in the Shipwrecked Sailor, whose figure is given so as to show the form in the most natural and beautiful manner; and the expression thrown into his countenance looking up to his preserver is unrivalled by anything that we have ever seen, while the easy flowing lines of this sailor are finely contrasted by those of his companions: the whole displaying the most perfect knowledge of the human frame, the finest taste to arrange it, and a command of the graver to embody to us what the artist's bright genius had shadowed out to himself.

But there is another pleasing motive for our admiration of this beautiful Medal, as the figure who is so humanely extending his relief to the drowning Mariner is a portrait of the Artist (the late WILLIAM WYON, Esq., R.A.) himself.

The following is a List of the GOLD and SILVER MEDALS that have been voted by the Committee of the Institution, since its establishment in 1824, to persons whose humane and intrepid exertions in saving Life from Shipwreck on our Coasts have been deemed sufficiently conspicuous to merit that honourable distinction. The Cases will be found recorded in detail in the several Annual Reports of the Institution.

The number of Medals granted by the Institution up to the present time is as follows:—

THE LIFE-BOAT STATION.

THE following brief description and diagrams illustrative of a complete Life-boat Establishment, including the house for the protection of the boat, will serve to convey an idea of the general character of one of the 233 Life-boat Stations of the NATIONAL LIFE-BOAT INSTITUTION.

It will be seen by them that it is a work of a costly nature, and that not only in the first instance but that a large permanent expense is entailed in keeping the whole machinery in an efficient state, in the re-supply of any part of it which may be destroyed or worn out, in the exercise of the boats' crews in launching and working the boats, and in remunerating them for their services in saving their fellow-creatures. Yet, looking to the vast importance of the result effected, and the responsibility of calling on men to risk their lives in effecting the same, it is felt that few if any persons will be found who will consider that expense to be incurred in vain.

THE LIFE-BOAT.

(See Diagrams on next page.)

The following figures show the general form, the nature of the fittings, and air-chambers of one of these boats, 33 feet in length and 8 feet in breadth. In figs. 1 and 2, the elevation and deck plans, the general exterior form of the boat is shown with the sheer of gunwale, length of keel, and rake of stem and stern-posts. The dotted lines of fig. 1 show the position and dimensions of the air-chambers within board, the relieving-tubes, and ballast. In fig. 2, A represents the deck, B the relieving-tubes (6 inches in diameter), C the side air-cases, D the end air-chambers, E ballast, F scuttles to admit of a free current of air under the water-tight deck, G scuttle for air, and to receive pump. In fig. 3, the exterior form of transverse sections, at different distances from stem to stern, is shown. Fig. 4 represents a midship transverse section, A being sections of the side air-cases, B the relieving-tubes, of the same depth as the space between the deck and the boat's floor. C, C, C, C, are spaces beneath the deck, placed longitudinally, at the midship part of the boat, with cases packed with cork, forming a portion of the ballast; D scuttle for ventilation, having a pump fixed in it, by which any leakage beneath the deck can be pumped out by one of the crew whilst afloat. The festooned lines in fig. 1 represent exterior life-lines attached round the entire length of the boat, to which persons in the water may cling till they can be got into the boat; the two central lines are festooned lower than the others, to be used as stirrups, so that a person in the water, by stepping on them, may climb into the boat without assistance.

This Life-boat possesses in the highest degree all the qualities which it is desirable that a Life-boat should possess:—

1. Great lateral stability or resistance to upsetting.
2. Speed against heavy sea.
3. Facility for launching and taking the shore.
4. Immediate self-discharge of any water breaking into her.
5. The important advantage of self-righting if upset.
6. Strength.
7. Stowage room for a large number of passengers.

THE LIFE-BOAT TRANSPORTING-CARRIAGE.

(See Diagrams on next page.)

The Life-boat transporting-carriage is a very important auxiliary to the boat. Every Life-boat, except a few of the larger size, is provided with a carriage, on which she is kept in the boat-house ready for immediate transportation to the most favourable position for launching to a wreck. A Life-boat is thus made available for a greater extent of coast than she otherwise would be; and even when launched from abreast of the boat-house, can be much quicker conveyed to the water's edge than she could be if not on a carriage. In addition to this ordinary use, a carriage is of immense service in launching a boat from a beach, to that extent, indeed, that one can be readily launched from a carriage through a high surf, when without one she could not be got off the beach.

The carriage consists of a fore and main body. The latter is formed of a keelway, and of side or bilgeways attached to the keelway, and resting on the main axle, the boat's weight being entirely on the rollers of the keelway. Its leading characteristic is that on the withdrawal of a forelock pin the fore and main bodies can be detached from each other. The advantages of this arrangement are that, whilst the weight of the boat when she is launched from the rear end forms an inclined plane by elevating the keelway and fore-carriage, to replace her on the carriage she can be hauled bow foremost up the fore end or longer incline, by disconnecting the fore-carriage, and letting the end of the keelway rest on the ground, thus forming an inclined plane up which the boat is easily drawn. The bilgeways are needed at the rear end, that the boat may be launched in an upright position, with her crew on board, but they are not required at the fore end of the carriage.

THE LIFE-BELTS IN USE BY THE CREWS OF THE LIFE-BOATS OF
THE INSTITUTION.

The requisite qualities of a life-boatman's life-belt are—

1. Sufficient extra-buoyancy to support a man heavily clothed, with his head and shoulders above the water, or to enable him to support another person besides himself.
2. Perfect flexibility, so as readily to conform to the shape of the wearer.
3. A division into two zones, an upper and lower, so that between the two it may be secured tightly round the waist; for in no other manner can it be confined sufficiently close and secure round the body without such pressure over the chest and ribs as to materially affect the free action of the lungs, impede the muscular movement of the chest and arms, and thereby diminish the power of endurance of fatigue, which, in rowing boats, is a matter of vital importance.
4. Strength, durability, and non-liability to injury.

The cork life-belts of the NATIONAL LIFE-BOAT INSTITUTION possess the first two qualities in a greater degree than any other life-belt, and the third one exclusively.

In addition to these belts a very full equipment of stores is supplied to the Life-boats of the Institution—such as anchors and cables, grapnels and lines, life-buoys, lanterns, rockets, and many other articles, together with portable or launching-skids.

THE LIFE-BOAT HOUSE.

The boats of the NATIONAL LIFE-BOAT INSTITUTION, and all belonging to them, are kept in roomy and substantial boat-houses, under lock and key, in charge of paid coxswains, under the general superintendence of local honorary committees of residents in the several localities. Each boat has its appointed coxswain at a salary of 8*l.*, and an assistant at 2*l.* a year. The crew consists, in addition, of a bowman, and as many boatmen as the boat pulls oars. The members of the volunteer crews are registered, and wherever practicable, at least double the number of men required are entered on the register. Such men are mostly resident boatmen, fishermen, or Coastguardmen. On every occasion of going afloat to save life, the coxswain and each of the crew receive alike from the funds of the Institution (whether successful or not) 10*s.*, if by day, and 1*l.*, if by night; and 4*s.* each for every time of going afloat for exercise.

A reward of 7s. is given to the man who first brings intelligence of a wreck at such a distance along the coast as not to be in sight of the Coastguard Station or other look-out.

A flag hoisted by day, and the firing of a gun twice, quick, by night, are the well-known signals for calling the crew together.

On boarding wrecks, the preservation of life is the sole consideration. Should any goods or merchandise be brought into the life-boat, contrary to the coxswain's remonstrance, he is authorised to throw them overboard.

The expense of a Life-boat Station averages 700*l.*, and is made up as follows:—

Life-boat and her equipment, including Life-belts for the Crew, Skids, and Transporting-carriage	£500
Boat-house (average cost)	200
	<hr/>
Total	£700

The average Annual Expense of maintaining a Life-boat Station is 70L.

Such is a brief summary of the chief of the Regulations under which the Life-boats are worked. How faithfully and with what result they are carried out let the journals of each Life-boat Station and the annals of the Institution tell.

The NATIONAL LIFE-BOAT INSTITUTION has now 233 Life-boats under its charge. Every one of these has been specially presented to it, and they save every year from 600 to 700 shipwrecked sailors. Altogether, the Institution has contributed to the saving of nearly twenty-one thousand lives.

Despite, however, this fleet of 233 Life-boats, and of 40 others locally provided and supported, and despite the numerous rocket and mortar stations on our coast, there remains the melancholy fact that an average of 700 lives are lost annually on and around our own shores alone, proclaiming solemnly, though silently, that, for humanity's sake, and for the national credit, no exertions should be spared in providing every possible means for the conveyance of succour to the shipwrecked.

The Institution needs at least a permanent income of 20,000*l.* to maintain its great Life-saving Fleet; and the Committee feel assured that it will never lack it so long as it maintains its boats in the state of thorough efficiency that they are in at the present time, and manned as they are on every emergency by as fearless and noble a class of men as ever our Nelsons and Collingwoods led to battle to uphold our country's honour and glory.

Treatment of the Apparently Drowned.

ROYAL NATIONAL LIFE-BOAT INSTITUTION.

Supported solely by Voluntary Contributions.

DIRECTIONS FOR RESTORING THE APPARENTLY DROWNED.

The leading principles of the following Directions for the Restoration of the apparently Dead from Drowning are founded on those of the late DR. MARSHALL HALL, combined with those of DR. H. R. SILVESTER, and are the result of extensive inquiries which were made by the Institution in 1863-4 amongst Medical Men, Medical Bodies, and Coroners throughout the United Kingdom. These Directions have been extensively circulated by the Institution throughout the United Kingdom and in the Colonies. They are also in use in Her Majesty's Fleet, in the Coast-guard Service, and at all the stations of the British Army at home and abroad.

I.

SEND immediately for medical assistance, blankets, and dry clothing, but proceed to treat the Patient *instantly* on the spot, in the open air, with the face downward, whether on shore or afloat; exposing the face, neck, and chest to the wind, except in severe weather, and removing all tight clothing from the neck and chest, especially the braces.

The points to be aimed at are—first and *immediately*, the RESTORATION OF BREATHING; and secondly, after breathing is restored, the PROMOTION OF WARMTH AND CIRCULATION.

The efforts to restore Breathing must be commenced immediately and energetically, and persevered in for one or two hours, or until a medical man has pronounced that life is extinct. Efforts to promote Warmth and Circulation, beyond removing the wet clothes and drying the skin, must not be made until the first appearance of natural breathing; for if circulation of the blood be induced before breathing has commenced, the restoration to life will be endangered.

II.—To Restore Breathing.

To CLEAR THE THROAT.—Place the patient on the floor or ground with the face downwards, and one of the arms under the forehead, in which position all fluids will more readily escape by the mouth, and the tongue itself will fall forward, leaving the entrance into the windpipe free. Assist this operation by wiping and cleansing the mouth.

If satisfactory breathing commences, use the treatment described below to promote Warmth. If there be only slight breathing—or no breathing—or if the breathing fail, then—

To EXCITE BREATHING.—Turn the patient well and *instantly* on the side, supporting the head, and excite the nostrils with snuff, hartshorn, and smelling salts, or tickle the throat with a feather, &c., if they are at hand. Rub the chest and face warm, and dash cold water, or cold and hot water alternately, on them. If there be no success, lose not a moment, but instantly—

To IMITATE BREATHING.—Replace the patient on the face, raising and supporting the chest well on a folded coat or other article of dress.

Turn the body very gently on the side and a little beyond, and then briskly on the face, back again, repeating these measures cautiously, efficiently, and perseveringly, about fifteen times in the minute, or once every four or five seconds, occasionally varying the side. [By placing the patient on the chest, the weight of the body forces the air out; when turned on the side, this pressure is removed, and air enters the chest.]

On each occasion that the body is replaced on the face, make uniform but efficient pressure with brisk movement, on the back between and below the shoulder-blades or bones on each side, removing the pressure immediately before turning the body on the side.

During the whole of the operations let one person attend solely to the movements of the head and of the arm placed under it. [The first measure increases the expiration—the second commences inspiration.]

. The result is *Respiration or Natural Breathing*; and if not too late—*Life*.

Whilst the above operations are being proceeded with, dry the hands and feet, and as soon as dry clothing or blankets can be procured, strip the body, and cover or gradually reclothe it, but taking care not to interfere with the efforts to restore breathing.

III.

Should these efforts not prove successful in the course of from two to five minutes, proceed to imitate breathing by DR. SILVESTER's method, as follows:—

Place the patient on the back on a flat surface, inclined a little upwards from the feet; raise and support the head and shoulders on a small firm cushion or folded article of dress placed under the shoulder-blades.

Draw forward the patient's tongue, and keep it projecting beyond the lips; an elastic band over the tongue and under the chin will answer this purpose, or a piece of string or tape may be tied round them, or by raising the lower jaw, the teeth may be made to retain the tongue in that position. Remove all tight clothing from about the neck and chest, especially the braces.

To IMITATE THE MOVEMENTS OF BREATHING.—Standing at the patient's head, grasp the arms just above the elbows, and draw the arms gently and steadily upwards above the head, and keep them stretched upwards for two seconds. (By this means air is drawn into the lungs.) Then turn down the patient's arms, and press them gently and firmly for two seconds against the sides of the chest. (By this means air is pressed out of the lungs.)

Repeat these measures alternately, deliberately, and perseveringly, about fifteen times in a minute, until a spontaneous effort to respire is perceived, immediately upon which cease to imitate the movements of breathing, and proceed to INDUCE CIRCULATION AND WARMTH.

IV.—Treatment after Natural Breathing has been Restored.

To PROMOTE WARMTH AND CIRCULATION.—Commence rubbing the limbs upwards, with firm grasping pressure and energy, using handkerchiefs, flannels, &c. [By this measure the blood is propelled along the veins towards the heart.]

The friction must be continued under the blanket or over the dry clothing.

Promote the warmth of the body by the application of hot flannels, bottles, or bladders of hot water, heated bricks, &c., to the pit of the stomach, the arm-pits, between the thighs, and to the soles of the feet.

If the patient has been carried to a house after respiration has been restored, be careful to let the air play freely about the room.

On the restoration of life, a teaspoonful of warm water should be given; and then, if the power of swallowing have returned, small quantities of wine, warm brandy and water, or coffee should be administered. The patient should be kept in bed, and a disposition to sleep encouraged.

General Observations.

The above treatment should be persevered in for some hours, as it is an erroneous opinion that persons are irrecoverable because life does not soon make its appearance, persons having been restored after persevering for many hours.

APPEARANCES WHICH GENERALLY ACCOMPANY DEATH.

Breathing and the heart's action cease entirely; the eyelids are generally half closed; the pupils dilated; the tongue approaches to the under edges of the lips, and these, as well as the nostrils, are covered with a frothy mucus. Coldness and pallor of surface increase.

CAUTIONS.

Prevent unnecessary crowding of persons round the body, especially if in an apartment.

Avoid rough usage, and do not allow the body to remain on the back unless the tongue is secured.

Under no circumstances hold the body up by the feet.

On no account place the body in a warm bath unless under medical direction, and even then it should only be employed as a momentary excitant.

By order of the Committee,

RICHARD LEWIS,

Secretary.

The object of this Institution, as declared in its title, is to afford assistance to every shipwrecked person around the coasts of the United Kingdom.

The chief means by which the Society hopes to carry this object into effect are:—

To build, station, and maintain in repair, Life-boats of the most perfect description; to furnish them with all necessary Appurtenances, including Houses to preserve them in, and Carriages for their conveyance to the spots where their Services are called for; and further, to provide, through the instrumentality of Local Committees, for their proper Management, and the occasional Exercise of their Crews.

To confer Honorary Rewards in the form of Medals and Votes of Thanks, and also to grant Pecuniary Remuneration to all persons who, at the risk of their own Lives, save, or attempt to save, those of others on board vessels wrecked, or in distress, upon any part of the coasts of the United Kingdom.

As an index of the necessity for the provision of such a machinery as the above, it may be stated—that the average loss of lives from shipwreck annually on the shores of the United Kingdom is 700.

Donations and Annual Subscriptions will be thankfully received by Messrs. WILLIS, PERCIVAL, and Co., 76 Lombard-street; Messrs. COURTS and Co., 59 Strand; Messrs. HERRIES, FARQUHAR, and Co., 16 St. James's street, London; by all the other London and Country Bankers; by the several Metropolitan Army and Navy Agents; and by the Secretary at the Office of the Institution, 14 JOHN STREET, ADELPHI, London—W.C.
